ABSTRACT

This report presents educational data from a representative sample of United States public school systems. The present report contains national estimates for several classifications of school systems as well as basic data tables giving quantitative financial data. Data were obtained from a survey of local public school systems designed to include all school systems with enrollments of 10,000 or more and a stratified sample (by enrollment size) of the systems with fewer than 10,000 pupils. The primary purpose is to provide quantitative information comparable from school system to school system with summary and trend data analyses. The following subjects are covered: total money being spent in school systems, variance in per-pupil expenditures among different types of school systems, sources of school system funds, variations in receipt patterns among systems, and proportion of federal funds received in different types of systems. Appendixes include sample design and selection, definitions and limitations of the data, and a reproduction of the survey report form. A related document is ED 043 960. (Author/MLF)

FOREWORD

This report is part of the continuing Elementary-Secondary General Information Survey (ELSEGIS), developed by the National Center for Educational Statistics (NCES), with the cooperation of the Committee on Educational Data Systems (CEDS) of the Council of Chief State School Officers.

During recent years, decisionmakers across the Nation have increasingly demanded quantitative data on the financial status of local public school systems. Requests for these data come from a wide variety of users, ranging from the President's Commission on School Finance, interested in making policy recommendations toward the alleviation of the fiscal problems of our Nation's school systems, to the school board member of a small local school system, interested in comparing the expenditure patterns of his school system with those of others of its size and type.

The present report contains national estimates for several classifications of school systems as well as basic data tables giving quantitative financial data. Data were obtained from a survey of local public school systems which was designed to include all school systems with enrollments of 10,000 or more and a stratified sample (by enrollment size) of the systems with fewer than 10,000 pupils. A companion report providing an analysis of these data is being prepared.

Our sincere thanks are due to the CEDS representatives, other State research and statistical personnel, and local school officials, whose assistance in this project resulted in a 99-percent response rate, a result attained, to date, in all surveys in the ELSEGIS series.

Carol J. Hobson, Chief
Elementary and Secondary
Surveys Branch

This report familiarizes educators with the general nature of various electronic teaching systems. The material is organized into major chapters on audio equipment, visual display equipment, television teaching systems, computer assisted instruction, and student response systems. Other chapters describe several systems and approximate equipment costs, and illustrate a typical physical layout and basic components of the system discussed. Appendixes contain a glossary of the most commonly used technical terms dealing with electronic teaching aids, the names and addresses of major manufacturers of electronic teaching equipment, a bibliography of suggested readings, basic information data sheets, and a list of other EFL publications. (Data sheets pp. 125-161 may reproduce poorly because of marginal legibility.) (MLF)

Identifiers—ESEA Title III, Harrisburg, Pennsylvania
This five-part document presents the results of a feasibility study of administrative reorganization commissioned by the Harrisburg, Pennsylvania, School District. The first section describes the research design, the data collection techniques, and the involvement of Harrisburg personnel in the study. Section two provides nineteen generalizations derived from the data, ten of which had their source in administrative data, and nine in teacher data. These generalizations characterize the current administrative structure and operation. Section three presents the recommendations for administrative reorganization, especially recommending that Harrisburg adopt the superintendency team concept to effect organizational improvement. Section four suggests a three-year timetable for implementing administrative reorganization, and section five describes some of the factors that will determine the cost of the organizational change. INTRODUCTION

This report on finances of local public school systems in the school year 1968-69 is the third annual report presenting basic data on the financial characteristics of local public school systems. The report, which is part of the Elementary-Secondary General Information Survey (ELSEGIS), is derived from data collected from a sample of 1,642 local public school systems.

National estimates are presented in tables A - I. Quantitative information on individual school systems included in the sample is given in five basic data tables. Educational researchers and school officials have found such data useful not only for comparison purposes, but also in short-range and long-term planning. A companion report presenting an analysis of these data is in preparation.

In the summary tables, the data are tabulated on the basis of three controls--enrollment size, metropolitan status, and region, as follows:

a. Six enrollment size groups:

   25,000 or more
   10,000 - 24,999
   5,000 - 9,999
   2,500 - 4,999
   300 - 2,499
   Under 300

The figure used for "enrollment size" is the average daily membership (ADM) for the 1968-69 school year reported in the survey. Thus, in both the national estimates and the basic data tables "enrollment size" actually refers to the reported number of pupils in ADM.

b. Three metropolitan status categories:

   Metropolitan, central
   Metropolitan, other
   Nonmetropolitan

The metropolitan-status categories have been designed to agree as closely as possible with "residence" criteria established by the Bureau of the Census considering that school system boundaries do not necessarily correspond with city or county boundaries. A school system is defined as metropolitan if it is located in a county defined as a Standard Metropolitan Statistical Area (SMSA) county. (In New England, SMSA's are determined on the basis of towns rather than counties.) If the school system is coterminous with or falls within the boundaries of a central city (the large city comprising the hub of the SMSA), it is classified "metropolitan, central"; if it falls within the SMSA but outside of the central city, it is considered "metropolitan, other."

Some large county-unit school systems include both the central city and the surrounding areas. In such cases, a 50-percent rule is applied. Where the population of the central city (1960 Census) was 50 percent or more of the county population, the county-unit system is here considered "metropolitan, central"; where the city

population accounted for less than 50 percent, the system is categorized "metropolitan, other." For example, the Mobile County, Ala., school system is classified "metropolitan, central," because Mobile city made up 54 percent of the total county population; but the Dade County, Fla., system is placed in the "metropolitan, other," category because the central city of Miami accounted for only 31 percent of the total county population.

School systems located outside of SMSA's are classified "nonmetropolitan."

c. Four regions of the United States:

North Atlantic	Great Lakes and Plains	Southeast	West and Southwest	
Connecticut	Illinois	Alabama	Alaska	Utah
Delaware	Indiana	Arkansas	Arizona	Washington
District of Columbia	Iowa	Florida	California	Wyoming
Maine	Kansas	Georgia	Colorado	
Maryland	Michigan	Kentucky	Hawaii	
Massachusetts	Minnesota	Louisiana	Idaho	
New Hampshire	Missouri	Mississippi	Montana	
New Jersey	Nebraska	North Carolina	Nevada	
New York	North Dakota	South Carolina	New Mexico	
Pennsylvania	Ohio	Tennessee	Oklahoma	
Rhode Island	South Dakota	Virginia	Oregon	
Vermont	Wisconsin	West Virginia	Texas	

The estimates shown in the summary tables are presented to the nearest thousand dollars. They are subject to both sampling and nonsampling errors. Sampling errors are covered in appendix A; other data limitations are discussed in appendix B.

Listed below are the two-position State abbreviations adopted recently by the U. S. Postal Service and used in the basic data tables.

Abbreviations for State Names

State	Abbreviation	State	Abbreviation	State	Abbreviation	State	Abbreviation
Alabama	AL	Hawaii	HI	Missouri	MO	Puerto Rico	PR
Alaska	AK	Idaho	ID	Montana	MT	Rhode Island	RI
Arizona	AZ	Illinois	IL	Nebraska	NB	South Carolina	SC
Arkansas	AR	Indiana	IN	Nevada	NV	South Dakota	SD
California	CA	Iowa	IA	New Hampshire	NH	Tennessee	TN
Canal Zone	CZ	Kansas	KA	New Jersey	NJ	Texas	TX
Colorado	CO	Kentucky	KY	New Mexico	NM	Utah	UT
Connecticut	CT	Louisiana	LA	New York	NY	Vermont	VT
Delaware	DE	Maine	ME	North Carolina	NC	Virginia	VA
District of Columbia	DC	Maryland	MD	North Dakota	ND	Virgin Islands	VI
Florida	FL	Massachusetts	MA	Ohio	OH	Washington	WA
Georgia	GA	Michigan	MI	Oklahoma	OK	West Virginia	WV
Guam	GU	Minnesota	MN	Oregon	OR	Wisconsin	WI
		Mississippi	MS	Pennsylvania	PA	Wyoming	WY

TABLES OF NATIONAL ESTIMATES

Table A.--Beginning balances and receipts of local public school systems, by enrollment size of system, with source of revenue receipts: United States, 1968-69

[In thousands of dollars]

Receipt account	Total	Enrollment size					
		25,000 or more	10,000-24,999	5,000-9,999	2,500-4,999	300-2,499	Under 300
Total beginning balances and receipts	$42,402,412	$12,735,924	$7,589,307	$7,103,454	$6,757,121	$7,541,235	$ 675,371

APPENDIX A

SAMPLE DESIGN AND SELECTION

Sample Design

The sample was designed to meet the following criteria:

1. Provide highly reliable national estimates.
2. Provide reasonably reliable estimates for each of the enrollment size strata.
3. Include all school systems with enrollments of 10,000 or more.
4. Include a stratum covering school systems with enrollments of under 300.

The variable "average daily membership," which was expected to be highly correlated with many other survey variables, was used as the design variable. The number of sample school systems in any stratum was to be of sufficient size so that the expected coefficient of variation of the sample estimate of "average daily membership" for the stratum would not exceed 5 percent. After all the enrollment size group constraints listed above were satisfied, the supplemental sample required for national estimates was allocated among the strata in accordance with an optimum allocation for national estimates of total enrollment. This led to a total sample of 1,667 school systems. The sampling fractions and other data pertinent to the sampling plan are shown in table i.

The sample was selected from the Office of Education's universe of some 18,600 operating local public school systems, as of fall 1969. All operating school systems were subdivided into the six strata based on enrollment size shown in table i. Enrollment size for this purpose was based on the number of pupils reported in the fall 1969 school system universe survey. In most cases this represented an average daily membership figure (ADM). All systems in the first two strata (10,000 enrollment or more) were included in the survey. For each of the remaining strata, a systematic random sample was chosen with the sampling fractions specified in table i.

Estimates of Totals

For estimating totals, the figures for each reporting school system were inflated by the reciprocal of the sampling rate in the stratum from which it was selected, adjusted for nonresponse. For estimates by "enrollment size," school systems were tabulated according to their reported ADM.

Sampling Reliability

Because the figures in this report are estimates derived from a sample, they are subject to sampling variability. As a guide to users of the data, approximate measures of the sampling reliability of the survey estimates are presented in

tables ii and iii. These tables show the estimated coefficient of variation, a measure of sampling variability, for each specified survey variable. The chances are about 2 out of 3 that the percentage difference between an estimate and the figure that would have been obtained from a complete canvass of all school systems, using the same survey forms and procedures, would be less than the limit of error specified in the table. Similarly, the chances are about 19 out of 20 that the percentage difference would be less than twice the specified limit of error and about 99 out of 100 that it would be less than 2.5 times the specified limit.

The coefficient of variation does not reflect response biases or systematic errors incurred in the data handling processes such as would be applicable even if there were complete coverage of all school systems. However, concerted effort was made to minimize such errors through editing and followup procedures.

Table 1.--Universe and sample

Sampling stratum enrollment size	Universe 1/	Sampling fraction (approximate)	Sample			
			Total	Respondents	Non-respondents	Inflation factor 2/
Total United States	18,548	-	1,667	1,642	25	-
25,000 and over	180	1:1	180	180	0	1.00
10,000 - 24,999	538	1:1	538	530	8	1.02
5,000 - 9,999	1,095	1:5	205	203	2	5.39
2,500 - 4,999	2,027	1:9	214	210	4	9.65
300 - 2,499	7,911	1:30	267	262	5	30.19
Under 300	6,797	1:26	263	257	6	26.45

1/ Represents the fall 1969 universe of school systems as published in Education Directory, 1969-70, Public School Systems adjusted to cover the elimination of California county special schools from survey, discontinued school systems, and miscellaneous adjustments.

2/ After adjustment for nonresponse.

Table ii.--Coefficients of variation for estimates of receipt variables by enrollment size, metropolitan status, and region 1/

APPENDIX B

METHODOLOGY AND SPECIAL NOTES

Survey Methodology

Data for this report were transmitted on a standard survey form (Appendix D), developed by NCES staff, in consultation with the Council of Chief State School Officers' Committee on Educational Data Systems (CEDS). Preaddressed and coded forms for the local school systems included in the sample were mailed to research and statistics department in each State education agency. States had the option either of providing the data from records already existing in their own files or of forwarding the form to the local school systems for completion. All but seven States were able to compile the reports from their own records.

To assure maximum comparability, the items and their definitions were designed to agree wherever possible with the categories and terminology of U.S. Office of Education Handbook II--Financial Accounting for Local and State School Systems.

A computer edit program was developed to detect serious reporting problems. Despite the increasing use of Handbook II, many variations in recording and accounting methods still prevail among the State and local school systems. As a result, the computer checks turned up numerous apparent reporting problems. Extensive followup was made with State and local school officials to resolve these problems. Every effort was made to secure data comparable from State to State and school system to school system. Remaining serious discrepancies or gaps in the data are indicated by footnotes in the basic data tables.

Explanation of Data

Item definitions are given in the instructions to the survey form (Appendix D). Some important explanations and limitations are given below:

Balances on hand at beginning and end of year. Some fiscally dependent systems do not carry balances because at the end of the fiscal year all unspent funds revert to the governmental unit of which the school system is a part. Balances do not necessarily indicate an excess of income over expenditures, because they usually are obligated for special purposes.

Revenue receipts from State sources do not include Federal funds distributed through the State education agency. Respondents were asked to include as State receipts the school-purpose contributions that, in some States, do not go through the books of the local school system; e.g., State contributions to employee retirement and textbooks furnished by the State. In many instances, the value of such contributions was estimated.

Revenue receipts from Federal sources include funds from Federal programs going to local school systems either directly or through the State as a distributing agency. Not included is the amount for Federal programs going to agencies other than the local public school system; e.g., that part of ESEA Title I dealing with programs for State operated or supported schools for the handicapped. For the most part, the receipts reported here are those recorded as receipts in the the school system's regular accounting procedures. They are not official Office of Education or State education agency figures on allotments or disbursements.

ESEA Title III. Sometimes more than one school system shared in a Title III project. Where this occurred, Title III receipts were sometimes reported only by the system receiving the funds.

Head Start and Follow Through. The data in this survey include only the Head Start and Follow Through programs operated directly by the local public school system. Programs operated by the school system in behalf of another agency or by a nonschool agency are not included.

Vocational education. In some cases, the distribution of vocational education funds by source (Federal vs. State receipts) was estimated.

National School Lunch and Special Milk Programs. The data in this report include financial assistance only; they exclude the value of donated commodities.

Incoming and outgoing transfers are shown in the basic data tables but excluded from the national estimates. Because incoming transfers of a given school system were also reported as receipts by the transferring school system, they would represent a duplication of total receipts at the national level. Similar duplication occurs on the expenditure side when the outgoing transfers of the transferring school system are also reported as expenditures by the receiving system.

Current expenditures allocable to pupil costs are the seven accounts listed in the tables under this category that, because of their direct relationship to the education program, were recommended in Handbook II for use in the determination of current expenditures per pupil.

Food Services and Student Body activities data were requested in terms of net expenditures. For food services this means gross expenditures less cafeteria sales; for student body activities it means gross expenditures less fees from athletic events or other activities for which admission was charged.

Payments into schoolhousing authority, by principal and interest, are shown in basic data table 3 under debt services. States and school systems had difficulty distributing these payments into principal and interest, because the selling of bonds and payment of principal and interest were actually done by the schoolhousing authorities. In some cases these quasi-public corporations actually own the school property and the "debt service" payments made by the local school systems are technically rent payments which include, in effect, principal, interest, and authority overhead. In other cases, the local school system will own the property when all payments are made. Wherever possible, estimates of the distribution were obtained; where such a distribution was not feasible, the entire payment was placed in the column labeled "principal." In tables C and D, these payments have been combined with principal of debt and interest on debt in order to obtain better national estimates of these accounts.

Further Considerations in Use of Data

In addition to the data limitations just cited, the users of the data who are interested in making direct comparisons between individual school systems should be guided by the following considerations.

1. The State education agencies and the local school systems were encouraged to provide reasonable estimates where precise data were not available. Comparisons between individual school systems may be affected to the extent to which they involve such estimates.

2. A complex of factors may be involved in the explanations of observed differences. Thus, there are instances in which a school system will compare unfavorably with another in terms of a given statistical indicator when it may be an equal or superior system. For example, suppose school system X makes considerably higher expenditures per pupil than system Y. On the surface, system X appears to be devoting more resources to education. Further investigation may indicate, however, that there are reasons for the differences which are not directly related to educational output. For example, although having a generally lower pay scale than system Y, system X may have a much higher proportion of older teachers drawing salaries near the top of the scale; the higher salaries, in turn, will lead to higher teacher retirement payments. This may result then in a higher general level of expenditures without necessarily a higher general level of support for public education or a superior program.

APPENDIX C

RELATED DATA

In addition to this study, which is designed to collect data on individual school systems as well as to provide national estimates, NCES conducts three surveys from which national financial statistics are derived. In each of these three surveys, data are collected in the form of State aggregate reports. That is, educational research and statistics staff in each State summarize local school system data and send NCES a composite State report.

The State Elementary and Secondary School Statistics survey, taken biennially, covers comprehensive data on public school organization, staff, pupils, and finances. Preliminary data from the 1967-68 biennial survey are shown in Preliminary Statistics of State School Systems, 1967-68; the final publication is being printed.

The Fall Report of Membership, Teachers, and Schoolhousing survey conducted annually early in the school year includes a supplemental section requesting estimates of four broad expenditure categories for the school year. Fall 1968 Statistics of Public Schools presents this information for the school year 1968-69.

Certification of Current Expenditures Made by Local Education Agencies for Free Public Elementary and Secondary Education is an annual survey conducted to establish the average per pupil expenditure in a State as required for the administration of the Title I of Public Law 89-10 (Elementary and Secondary Education Act of 1965) and Title I of Public Law 81-874 (School Assistance in Federally Affected Areas). The most recent publication based on this survey is Current Expenditures by Local Education Agencies for Free Public Elementary and Secondary Education, 1968-69.

The biennial survey and the fall report include data on finances of intermediate administrative units and the State education agency; the current expenditure survey does not.

Because of differences in purpose, coverage, and method of data collection, estimates in the present publication will differ from figures for the same or similar variables presented in the other OE publications.

Relationship of ELSEGIS Financial and Personnel Series. At present, two series of reports are published from the Elementary- econdary general information survey (ELSEGIS)--the series on financial data which includes the present report, and the series on personnel data.[1/] Although it is the ultimate aim of ELSEGIS to integrate personnel and financial data, this goal has not yet been achieved. In the developmental years of the survey, emphasis was placed on the attainment of reliable data and estimates for the separate parts rather than on the integration of the two parts. Consequently, the two series must be treated as separate and independent entities. Thus, if estimates on personnel from the report Statistics of Local Public School Systems, Fall 1968, Schools, Pupils and Staff are to be analyzed in relation to financial estimates from the present publication, such analyses must be made with caution, recognizing the following limitations:

1. Although the reports **are intended to cover the same school year, 1968-69, the samples from which the estimates are based were selected from different**

1/ The report Statistics of Local Public School Systems, Fall 1969, Pupils and Staff, is being released at about the same time as this publication. Statistics of Local Public School Systems, Fall 1968, Schools, Pupils and Staff, was published in 1970.

populations. The sample for the personnel survey was selected from the fall 1968 universe of local public school systems while that for the present financial survey was selected from the fall 1969 universe. Because personnel data are usually available early in the school year but financial data are frequently not available until 9 months after the close of the school year, a lag of about 1 1/2 years, the survey package developed consisted of a personnel part covering the current year and a financial part covering the previous school year. Each part had the same sample drawn from the same universe. Thus, for example, the survey package popularly known as ELSEGIS II covered personnel data for fall 1969 and financial data for the school year 1968-69. On the other hand, the fall 1968 personnel data, which is for the same year as the ELSEGIS II financial data, was collected in ELSEGIS I with a different sample drawn from an earlier universe. For future surveys, steps are being taken to make the estimates of personnel and financial data for the same year more compatible.

2. In most State education agencies, personnel data are collected and kept separate from financial records and are sometimes maintained in different parts of the agency. Therefore, the two ELSEGIS parts are frequently prepared by different personnel.

ELSEGIS - II

PART B - FINANCES: SCHOOL YEAR 1968-69

INTRODUCTION

This is the financial part of ELSEGIS II, the second annual Elementary-Secondary General Information Survey conducted by the U.S. Office of Education with the cooperation of the Committee on Educational Data Systems *(CEDS)* of the Council of Chief State School Officers. The national sample of local public school systems is the same as the one reporting in ELSEGIS II A - Pupils and Staff: Fall 1969.

School systems across the Nation are experiencing increasing difficulty in finding the resources to meet the rapidly rising educational expenditures, a condition especially prevalent in large urban school systems. For this reason the collection of comprehensive and comparable data on the finances of local school systems is imperative.

Data from ELSEGIS I B - Finances: School Year 1967-68 have been the only sources of detailed data on individual school systems. The National Center for Educational Statistics has made these data available to those interested in doing research with the aim of improving American education. Your cooperation in the continued success of this important survey series is very much appreciated.

In completing the items, please follow the enclosed instructions and refer to Handbook II, Financial Accounting for Local and State School Systems.

Instructions For Completing OE FORM 2350-1

ELEMENTARY-SECONDARY GENERAL INFORMATION SURVEY II, PART B

GENERAL INSTRUCTIONS

Enter data in the applicable boxed areas, placing the entry to the far right and leaving any blank space on the left. DO NOT LEAVE ANY LINE BLANK. If there is no entry for a particular line, enter a zero (0) in the units position of the data field. If actual data are not available, please provide your best estimate of the entry for that variable, and enter "EST." in red in the margin of the form. Report to the nearest DOLLAR.

In order to achieve maximum comparability, certain entries which in some States do not go through the books of the local school system should nevertheless be included on both the "receipts" and the "expenditures" sides of the report. Two important examples are:

TEXTBOOKS FURNISHED BY THE STATE. The value of such books should be reported in receipts under REVENUE FROM STATE SOURCES, item D, and in expenditures under OTHER INSTRUCTIONAL EXPENDITURES, item J.2.d.

STATE CONTRIBUTION TO EMPLOYEE RETIREMENT. This amount should be reported in receipts under REVENUE FROM STATE SOURCES, item D, and in expenditures under FIXED CHARGES, item J.8.

NOTE: The definitions given here are, for the most part, condensations of those given in Handbook II *(Financial Accounting for Local and State School Systems)*. Please refer to this manual in completing the form.

SPECIFIC INSTRUCTIONS

IDENTIFICATION DATA:

STATE CODE: Entered by the Office of Education

OE NUMBER: Entered by the Office of Education

STATE SCHOOL SYSTEM IDENTIFICATION NUMBER: For optional use by State Education Agency

ITEM A. BALANCES ON HAND BEGINNING OF YEAR

Line 1. Enter the balance of all funds on hand from previous year which were available for the current operations of schools in the school year 1968-69, i.e., all those balances not earmarked for the special purposes listed in the instructions for line A.2.

Line 2. Enter the balances set aside for (a) new construction or modifications of physical plants and (b) retirement of principal and payment of interest on serial bonds.

ITEM B. REVENUE FROM LOCAL SOURCES *(10)*.

NOTE: The numbers in parenthesis after the line number refer to Handbook II codes.

Line 1. *(11)*. Include taxes received from school system levies and taxes or appropriations received from local governmental units other than the school systems.

Line 2. *(12, 13)*. Include tuition and transportation fees received from patrons.

Line 3. *(14)*. Enter here other revenue receipts from local sources such as earnings from permanent funds, endowments, deposits, and investments; NET receipts from food services, student body, or other activities; rents, gifts, etc.

ITEM C. REVENUE FROM INTERMEDIATE SOURCES *(20)*.

Include funds collected by a subdivision between the local school system and the State *(e.g., county, supervisory union, etc.)* and distributed to school systems in amounts different from those collected within the systems.

ITEM D. REVENUE FROM STATE SOURCES *(30)*.

Include here only those funds collected by the State and distributed to the systems. DO NOT include funds from the Federal Government that are distributed through the State agency. Include the value of textbooks provided by the State to the local school system and the State contribution to local school system employee retirement.

ITEM E. REVENUE FROM FEDERAL SOURCES, BY PROGRAM *(40)*.

Include here all funds received from the Federal Government either directly or through the State as a distributing agency.

This instruction is consistent with the revision to Handbook II made by the Office of Education – Committee on Educational Data Systems *(OE-CEDS)* School Finance Standing Committee. The change was transmitted to the State education agencies by a memorandum dated February 16, 1966. Essentially, this memorandum provided that the sections on REVENUE FROM

STATE SOURCES and REVENUE FROM FEDERAL SOURCES *(pp. 15-17)* be reorganized as follows:

30. Revenue From State Sources

40. Revenue From Federal Sources

40a. Federal Money Received Directly From the Federal Government

40b. Federal Money Received Through the State

Line 1. Include receipts under ESEA Title I for the support of educational programs in areas having high concentrations of low-income families.

Line 2. Include receipts under ESEA Title II for school library resources, textbooks, and other instructional materials.

Line 3. Include receipts under ESEA Title III for supplementary educational centers and services.

Line 4. Include receipts under NDEA Title III to strengthen instruction in critical subjects.

Line 5. Include receipts under NDEA Title V-A for the establishment and maintenance of guidance, counseling, and testing programs.

Line 6. Include receipts under Public Law 815 to aid school districts in providing minimum school facilities in federally impacted and disaster areas.

Line 7. Include receipts under Public Law 874 for operational aid to school districts on which Federal activities or major disasters have placed a financial burden.

Line 8. Include receipts for Head Start programs operated directly by the school system. Do not include programs operated by the school system on behalf of another agency or by the other agency itself.

Line 9. Include receipts for Follow Through programs operated by the local school system.

Line 10. Include receipts received under the Federal Vocational Education Acts. Do not include State Vocational Education funds.

Line 11. Include funds received under the National School Lunch and Special Milk Programs. REPORT CASH PAYMENTS ONLY. DO NOT include the value of commodities.

Line 12. All other Federal receipts – Include here any receipts not covered in lines 1-11 above.

ITEM F. TOTAL NONREVENUE RECEIPTS *(50-70)*. Enter here receipts from the sale of bonds, loans, sale of real property and equipment, and proceeds from insurance adjustments.

ITEM G. INCOMING TRANSFERS *(80-90)*. Enter here the total amount received from other school systems for tuition, transportation, or other services rendered.

ITEM J. CURRENT EXPENDITURES, SCHOOL YEAR 1968-69. Report current expenditures made during the school year 1968-69 from all funds regardless of source of funds. The receipts for such expenditures may have come from local, State, or Federal sources. School systems which were not in operation in the school year 1968-69 *(including those which were nonoperating in the school year 1968-69 and those which were newly organized or reorganized in 1969-70)* will have no financial records for 1968-69. Such systems should report on the basis of budget estimates for the school year 1969-70.

Line 1. *(100 series)*. Include expenditures for those activities which have as their purpose the general regulation, direction, and control of the affairs of the school system that are system wide and NOT confined to one school, subject, or narrow phase of activity. Include salaries, contracted services, and other expenses for administration.

Line 2a. *(211-214)*. Include salaries of professional instructional staff – teachers, principals, assistant principals, supervisors of instruction, guidance and psychological staff, librarians, and audiovisual staff.

Line 2b. *(215-216)*. Include salaries of nonprofessional instructional staff – teacher aides, secretarial and clerical assistants, and any others who aid the professional instructional staff.

Line 2d. *(220-250)*. Include expenditures for the textbooks furnished free to pupils, including the value of textbooks provided by the State, school libraries and audiovisual materials, teaching supplies, the net cost to the school system of rented books, and other expenses for instruction.

Line 3. *(300 series)*. Include salaries and other expenses for those activities which have as their primary purpose the promotion and improvement of children's attendance at school.

Line 4. *(400 series)*. Include salaries and other expenses for physical and mental health activities *(other than direct instruction)*, i.e., medical, dental, psychiatric, and nurse's services.

Line 5. *(500 series)*. Report salaries and other expenses for those activities which have as their purpose the conveyance of pupils to and from school activities, either between home and school or on trips for curricular or cocurricular activities, including: salaries of drivers, mechanics, etc.; contracted services or public carriers; replacement of vehicles; pupil transportation insurance; expenditures in lieu of transportation; and operation and maintenance of transportation equipment.

Line 6. *(600 series)*. Include salaries and other expenditures concerned with keeping the school plant open and ready for use.

Line 7. *(700 series)*. Include salaries and other expenditures for activities concerned with keeping the grounds, buildings, and equipment at their original condition of completeness or efficiency.

Line 8. *(800 series)*. Report expenditures of a generally recurrent nature which are not readily allocable to other expenditure accounts, including: employer contributions *(State or school system)* to employee retirement, insurance and judgments, rental of land and buildings *(EXCLUDING lease payments to authorities)*, and interest on current loans.

Line 10. Report the NET expenditures, if any, of the food services operation, i.e., the gross expenditures, less the cafeteria sales. If the receipts from cafeteria sales equal or exceed expenditures, enter a zero on this line. Exclude the value of commodities donated by the U.S. Department of Agriculture.

Line 11. Report the NET expenditures, if any, for such extracurricular activities as interscholastic athletics, entertainment, publications, and clubs. If any receipts from such activities exceed expenditures, enter a zero on this line.

Line 12. Include expenditures for (a) services provided by the school system for the community, such as recreational activities, civic activities, public libraries operated by the school system, child care centers of the school system, welfare activities of the school system, services to nonpublic school pupils, etc., (b) summer schools, i.e., schools in session between the end of the regular school term and the beginning of the next regular school term. Include expenditures for summer Head Start programs operated as part of the school system's program, (c) adult education programs, and (d) junior college programs *(grades 13 and 14)* operated by the local public school system.

ITEM K. CAPITAL OUTLAY *(1200 series)*.

Line 1. *(1210-1220)*. Include expenditures for the acquisition of sites, new buildings, and improvements to existing structures.

Line 2. *(1230)*. Include expenditures for NEW items of equipment.

ITEM L. DEBT SERVICE *(1300 series)*.

Line 1. *(1310)*. Enter the amount expended to retire serial bonds, short-term and long-term loans, warrants, or bills.

Line 2. *(1320)*. Enter the amount expended for interest on bonds, and short-term and long-term loans.

Line 3. *(1330)*. Enter the amount paid into sinking funds which are to be used at some future date to retire term bonds.

Line 4a. *(1340a)*. Enter the amount paid for principal to schoolhousing authority or similar agency.

Line 4b. *(1340b)*. Enter the amount paid for interest to schoolhousing authority or similar agency.

Line 5. *(1350)*. Enter here expenditures for any expense incurred in connection with debt service not covered above. *(Exclude those connected with the sale of bonds.)*

ITEM M. OUTGOING TRANSFERS *(1400 series)*. Enter here those payments made to other school systems or administrative units for tuition and transportation.

ITEM P. BALANCES ON HAND AT END OF YEAR

Line 1. Enter the balances of all funds which will be available for the current operation of schools in the school year 1969-70, i.e., those balances not earmarked for the special purposes listed in the instructions for line P.2.

Line 2. Enter the end-of-year balances set aside for: (a) new construction or modifications of physical plant or (b) retirement of principal and payment of interest on serial bonds.

ITEM R. ATTENDANCE AND MEMBERSHIP IN FULL-TIME ELEMENTARY-SECONDARY DAY SCHOOLS IN SCHOOL YEAR 1968-69. Report Average Daily Attendance *(ADA)* and Average Daily Membership *(ADM)* in full-time elementary and secondary day schools in accordance with the formulas given below; exclude students in summer schools, adult education, or junior colleges. Report to the nearest WHOLE NUMBER.

$$\text{ADA} = \frac{\text{Annual aggregate days attendance}}{\text{Actual number of days taught}}$$

$$\text{ADM} = \frac{\text{Annual aggregate days attendance plus annual days absence}}{\text{Actual number of days taught}}$$

A half-day nursery school or kindergarten should be counted as full-time for purposes of determining average daily attendance and average daily membership. For example, if 100 pupils attended nursery school in the morning and a different group of 100 pupils attend in the afternoon, the aggregate attendance for the day would be 200.
